

Xpodigital Outdoor WiFi Services Are You Ready for November?

NHLA Lodging Member's Special Offer

Venues across Las Vegas are preparing now to host groups, guests, and fans for an exciting new year of indoor/outdoor events, including the big race, the big game, and other globally viewed sports and entertainment extravaganzas!

Does your property's WiFi Network expand seamlessly into the outdoor spaces guests will need? If not, WiFi dead spots could ruin the investments you're making to support these major events, leaving guests struggling to share their experiences, and vendors sidelined and unable to capture critical sales.

Xpodigital is here to help, with a special offer for NHLA Member Hotels!

Network Consulting - Engineering - Architecture - Security - Onsite Labor - 24/7 Support

Xpodigital's Event Internet Technology provides secure, powerful high-density WiFi bandwidth for crowded indoor and outdoor areas, including Grandstands, Infield Areas, Pits, Team Offices, POS, Meet & Greets, Broadcasting Booths, and anywhere else you need coverage.
